

## Inclement Weather/Reduced Services

Whenever severe weather creates difficult traveling situations, a decision must be made as to how the weather will interfere with the effective operation of the University. The University makes every effort to remain open, regardless of conditions, when students are in residence. However, when severe weather or other emergencies force reduction in services, announcements will be aired on the radio and TV stations listed on the Media Listings button below.

All faculty, staff and students are encouraged to sign up for FP Alerts that will alert you either by email or text message when we have a delay, early release or a closure.
